

MAINTAIN OPERATIONAL ADVANTAGE

Blackhawk Aerospace brings over 20 years of providing engineering evaluations for the development of engine and propeller replacements to government and defense customers worldwide. Our technologically advanced systems allow customers to benefit from maintenance and operational cost savings, combined with increased performance, that ultimately results in expanded mission capabilities and extended life cycles for decades to come.

SUSTAINMENT SOLUTIONS

From engine and propeller upgrades to engine gauges and comprehensive engine management programs, Blackhawk Aerospace Solutions offers a range of products and services that significantly enhance King Air series and Caravan aircraft readiness.

Engine Performance Solutions

KING AIR 200 /C-12 HURON	CARAVAN	
✓ XP42, XP52 and XP61	✓ Vx and XP140	Engine Upgrades Each including higher performance propellers.
✓	✓	Hawkeye DigiLog Gauges
✓	✓	Engine MRO
✓	✓	Propeller Upgrades
✓	✓	Propeller MRO
✓	✓	Engine Management Programs

KING AIR 300/350ER

Two Factory-New Pratt & Whitney Canada
(P&WC) PT6A-67A Engines (Exchange)

Two Factory-New 5-Blade Natural Composite
MT Propellers with Spinners (Exchange)

Measurable Benefits

IMPROVED PERFORMANCE

INCREASED RELIABILITY

BETTER EFFICIENCY

REDUCED ENGINE-RELATED AOG

HIGHER SAFETY MARGINS

LOWER OVERALL COSTS

Endurance Kits

KING AIR 350

Designed to perform in challenging ISR environments including air ambulance, surveillance, aerial survey, and a number of additional, demanding mission scenarios. The complete XR Endurance Kit features:

- Pratt & Whitney Canada PT6A-67A engines
- Lightweight 5-blade natural composite MT Propellers
- CenTex Aerospace Saddle Tanks
- Heavyweight landing gear
- High flotation tires
- Fully enclosed landing gear doors
- Maritime rudder
- True Blue Power TB44 lithium-ion battery

MRO Management

SIMPLIFY YOUR MAINTENANCE OVERSIGHT

Our highly skilled team manages every aspect of your MRO, from program management and analysis to shipping logistics. We put our years of experience supporting government agencies to the highest government standards together with our agile, small business focus to deliver on-time, high quality, and efficient support.

Program Features:

- Real-time daily status updates
- Proactive inspection alerts
- 100% on time delivery
- Dedicated program manager assigned to each customer
- Vetted network of vendors to support all aspects of the work
- Full-service manufacturing shop, including composites
- Fastest turn-around times for MRO engines and propellers in the industry

GLOBAL SUPPORT

Blackhawk Aerospace Solutions' global customer support network of more than 30 qualified representatives are conveniently located throughout the United States, Asia/Pacific, Europe, and the Middle East to provide service center and mobile support. Our Program Managers work directly with you to coordinate the support you need to get you back in the air.
