01

FLY AT 270+ KTAS ON A STANDARD DAY

That's an average of 35 ktas faster than with stock engines, dependent upon your model of King Air.

02

36% INCREASE IN AVAILABLE HORSEPOWER

More power at cruise altitude (1,900 RPM at 26,000 feet ASL).

03

ACCESS TO MORE AIRPORTS

Get in and out of more airports, especially on hot days and in high density altitude conditions.

04

REDUCE TIME TO CLIMB BY 21%

You will now have the power to climb through and above inclement weather.

05

FILE FOR HIGHER

Reduce costly fuel consumption by reaching higher altitudes quicker with more available horsepower.

06

IMPROVED SAFETY

Enjoy added peace of mind with an increased single-engine service ceiling.
